Lens type: lens for ocular bandage
Packaging: 5 lenses in blister
Production system: molding
Material: Metafilcon A
Uv absorber: yes
Water content: 55%
Dk/t: 20.0
Geometry: HD aspherical
BC: 8,90
Diameter: 14,20
Spherical power: 0.00
Color: Blue tint
CND: Y210309

Tips and tricks

The proyal Bandage geometry can be used on almost totality of the corneas, suggesting a range of corneal curvature from 7.6 mm to 8.30 mm.

Proyal lenses are suitable for corneal epithelial lesions and other corneal suffering in addition to eye drops. The using should be prescribed by the ophthalmologist.
